

Five Guys Enterprises makes every attempt to identify ingredients which may cause allergic reactions for those with food allergies. Every effort is made to instruct our food production staff on the severity of food allergies. However, there is always a risk of contamination. There is a possibility that manufacturers of foods we use could change the formulation at any time, without notice. There is also a risk of cross contamination due to the nature of our ingredients. Customers concerned with food allergies need to be aware of this risk. Five Guys Enterprises and their franchisees will not assume any liability for adverse reactions to foods consumed, or items one may come into contact with while eating at any Five Guys restaurant.

Nutritional information provided on this site is based on representative values provided by suppliers, published resources, analysis using industry standard software and testing conducted in accredited laboratories. Information is expressed in values based on federal rounding and other applicable regulations. Five Guys cannot guarantee the nutritional information provided on this site is fully accurate as it relates to the prepared menu items in all of our restaurants. Our menu items are made to order by hand. This may cause slight variations in serving sizes which may affect the nutrition values for each product.

Recommended limits for a 2,000 calorie daily diet are 20 grams of saturated fat and 2,300 milligrams of sodium.
